(54) Title: INTEGRATED SIMULATION FABRICATION AND CHARACTERIZATION OF MICRO AND NANO OPTICAL
ELEMENTS

(57) Abstract: The invention is directed to inserting a fiber into a piezo tube scanner so as to create an optical focusing device. The
method and device integrates between theory, characterization methodology and integrated production methodologies that allow for
the control of fabrication and the generation of structures that could not be fabricated or whose fabrication could not be controlled
before the realization of such integrated and interconnected methodologies of simulation, production and characterization that had
